

## Tackling Antimicrobial Resistance

Dear colleagues,

We take immense pleasure to announce our CME titled “**TACKLING ANTIMICROBIAL RESISTANCE**”. The ever-increasing problem of antimicrobial resistance is a constant worry for both clinicians and microbiologists alike. The government of Kerala has already initiated a strategic action plan incorporating One Health approach (KARSAP) to curb resistance. This CME is a humble attempt to decrypt the antimicrobial resistance puzzle so that all stakeholders in patient care can implement control strategies for the same. We cordially invite one and all to be a part of this initiative and make it a grand success. Looking forward to your participation.

### CME SCHEDULE
